## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of species I, Figure 2, claims 1, 4, 6 and 12 in the reply filed on July 22, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Currently, claims 1-4, 6 and 12 are readable on the elected species I.
3. Claim 5, 7-11 and 13 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to the nonelected species.

### ***Drawings***

4. Figures 8-11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3751

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 6 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by McKinley (2,818,167).

The McKinley reference discloses a slider 39 for holding a stick of solid paste including a plate portion 41, a cylindrical portion projecting from the center of the plate portion 41 on one of the opposite sides thereof, and an engaging protrusion 45 radially outwardly extending from the cylindrical portion and (made of rubber) capable of being deformable at least at an outer edge portion thereof in a direction essentially corresponding to that of the longitudinal axis of the cylindrical portion.

Regarding claim 2, wherein the engaging protrusion 39 is in the form of a circular attached to a free end of the cylindrical portion coaxially therewith.

Regarding claim 6, the cylindrical portion includes a threaded through bore 40.

Regarding claim 12, a solid dispenser includes a slider 39, screw rod 37, guide ridges 42, a tail plug 35, and an engaging protrusion 45.

#### ***Allowable Subject Matter***

7. Claims 3 and 4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Duval reference shows a slider 44 with a engaging protrusions.
